KEOL INNOVATION & socomore

A NEW PARTNERSHIP

A GLOBAL PRECISION BONDING SOLUTION

KEOL, a bonding specialist, and SOCOMORE, a worldwide specialty chemist for critical surface are joining forces to offer a comprehensive, end-to-end solution of technical adhesives including UV-cured adhesives and structural bonding, also covering dispensing machines, and subcontracting services, for a global answer to their customers' bonding needs.

Why does this collaboration make sense for our customers?

This partnership is driven by a shared goal to **provide robust and reliable bonding solutions** for common and specific challenges players in SOCOMORE and KEOL's respective markets. This collaboration delivers comprehensive, high-reliability bonding solutions **for critical industrial applications**, combining advanced adhesives, precision dispensing and cutting-edge technical know-how.

KEOL

- Founded in 2014 with a strong commitment to R&D (15% of turnover)
- Technical support and training with on site assistance
- KEOLab: Study, testing, and trial laboratory for precise and certified application
- Logistical flexibility: efficient supply chain management and fast delivery.

SOCOMORE

- +50 years of experience in critical surface application for various industries
- 5 laboratories worldwide and 14% of headcounts in R&D
- 14 sales companies worldwide powered by 8 manufacturing plants within the Group
- +1000 approvals by 150 major industrial actors

KEOL
INNOVATION

Advanced bonding expertise

Low-impact solutions
from lab to integration

A 360° OFFER

UV Adhesives

Ultimate performance, instant curing

- **Instant curing**
  In seconds under UV light
- **Exceptional strength**
  Up to 20 MPa shear
- **Application precision**
  Adapted viscosities
- **Made in France**
  & 40% bio-based

Precision dispensing

High-precision 316L stainless steel valves

- **Spray Valves**
  Precision atomization and spraying
- **1K Valves**
  Precise dispensing for 1K adhesives
- **2K Valves**
  Dispensing and mixing for 2K adhesives

Estimate your need

LED curing solutions

Portable | Gun | Spot
Surface | Oven | Conveyor

- **Reduced consumption**
  Low consumption LED tech
- **Limited heating**
  For sensitive substrates
- **Optimized cycle times**
  Instant start-up & fast curing
- **Reliable & measured curing**
  For consistent quality

Specialized integrated machines

Fully integrated dispensing and curing automated machines

- **Special design**
  tailored to your production line
- **Built around standard modules**
  for greater reliability
- **Integration of automation**
  into your production system
- **Designed and assembled** in-house

ADVANTAGES

- **Comprehensive bonding solutions:** providing end-to-end industrial bonding, from custom UV-adhesive formulation to full French-made system integration.
- **Eco-Innovation:** integrating bio-sourced components through intensive R&D providing sustainable adhesives and reduce waste via precision dispensing.
- **Tailor-made:** delivering bespoke adhesive qualifications and custom repair kits adapted to your unique mechanical constraints.
